

Quantum[®] Edge Bolsa[®]

Quantum[®] Edge forms a frame around our **Bolsa[®]** unit, providing a better edge than foam, reducing or eliminating that roll-off feeling, and delivering a consistent sleep surface.

- Proven 26% more durable than foam encasements.
- On adjustable bases, Quantum Edge bends an average of 24% easier than foam encasements, which means less wear and tear on moving parts.
- Ability to compress, fold, and roll-pack for your shippable mattress program.

The **Bolsa[®]** coils that form the interior of this unit provide an even surface that absorbs partner movement and prevents sleepers from rolling together.

- We produce our own wire, which ensures quality-controlled steel in every spring.
- Pre-compressed coils create a firm surface that makes the unit more responsive to body movements.

ComfortCore[®] coils feature stress-relieved wire that holds its shape and provides a durable, consistent sleep surface. The wire flexes and conforms to the individual contours of the body for superior comfort and reduced partner disturbance.

comfortcore[®]
fabric-encased coil technology

Innersprings sleep up to 28% cooler than foam.*
